Chat question

Which competencies are you finding most helpful in supporting internal or external collaboration?

KEYS TO SUCCESS

1. Sustaining collaboration - Structure the group and its work in a way that gives everyone skin in the game. Members can count success as their own. Have a strategy and a vision.
2. Voluntary Participation – People want to be a member of the team, they see value and personal and professional comradery. They enjoy the other team members. You can tell when there is someone on the team that is not.
3. Collaboration is hard! -- Everyone comes to the table with a different definition and expectation. You have to work at it every day and there is still conflict. It takes patience, deliberate collaborative leadership and active facilitation.
